

Heightened emotions: the new competition packages for the Audi RS 4 Avant and Audi RS 5

Audi Sport GmbH is turning up the metaphorical dial and raising the sportiness of the Audi RS 4 Avant* and the Audi RS 5* to a multiple power. The new competition packages are full of extras that both enhance their sporty appearance as well as ensuring maximum dynamics and driving enjoyment. The potent twin-turbo V6 delivers 331 kW (450 PS) and 600 newton meters of torque.

See how Audi Sport GmbH pushes the limits of driving dynamics on the RS 4 Avant*, the RS 5 Coupé*, and the RS 5 Sportback* even further with the competition plus package.

The Audi Group is one of the most successful manufacturers of automobiles and motorcycles in the premium and luxury segments. The brands Audi, Ducati, Lamborghini and Bentley produce at 21 locations in 13 countries. Audi and its partners are present in more than 100 markets worldwide.

In 2021, the Audi Group delivered around 1.681 million cars from the Audi brand, 8,405 sports cars from the Lamborghini brand and 59,447 motorcycles from the Ducati brand to customers. In the 2021 fiscal year, AUDI AG achieved a total revenue of €53.1 billion and an operating profit before special items of €5.5 billion. More than 89,000 people all over the world work for the Audi Group, around 58,000 of them in Germany. With its attractive brands, new models, innovative mobility offerings and groundbreaking services, the group is systematically pursuing its path toward becoming a provider of sustainable, individual, premium mobility.

The equipment, data and prices specified in this document refer to the model range offered in Germany. Subject to change without notice; errors and omissions excepted.

**The collective fuel consumption and emissions values of all models named and available on the German market can be found in the list provided at the end of this text.*

Fuel consumption and emissions values of the models named above****Audi RS 4 Avant**

Combined fuel consumption in l/100 km (62.1 mi): 8.8 (26.7 US mpg);
combined CO₂ emissions in g/km: 201 (323.5 g/mi)

Audi RS 5 Coupé

Combined fuel consumption in l/100 km (62.1 mi): 8,7 (27.0 US mpg);
combined CO₂ emissions in g/km: 199 (320.3 g/mi)

Audi RS 5 Sportback

Combined fuel consumption in l/100 km (62.1 mi): 8.8 – 8.7 (26.7 – 27.0 US mpg);
combined CO₂ emissions in g/km: 200 (321.9 g/mi)

***The indicated consumption and emissions values were determined according to the legally specified measuring methods. Since September 1, 2017, type approval for certain new vehicles has been performed in accordance with the Worldwide Harmonized Light Vehicles Test Procedure (WLTP), a more realistic test procedure for measuring fuel consumption and CO₂ emissions. Since September 1, 2018, the WLTP has gradually replaced the New European Driving Cycle (NEDC). Due to the more realistic test conditions, the consumption and CO₂ emission values measured are in many cases higher than the values measured according to the NEDC. Additional information about the differences between WLTP and NEDC is available [at www.audi.de/wltp](http://www.audi.de/wltp).*

At the moment, it is still mandatory to communicate the NEDC values. In the case of new vehicles for which type approval was performed using WLTP, the NEDC values are derived from the WLTP values. WLTP values can be provided voluntarily until their use becomes mandatory. If NEDC values are indicated as a range, they do not refer to one, specific vehicle and are not an integral element of the offer. They are provided only for the purpose of comparison between the various vehicle types. Additional equipment and accessories (attachment parts, tire size, etc.) can change relevant vehicle parameters, such as weight, rolling resistance and aerodynamics and, like weather and traffic conditions as well as individual driving style, influence a vehicle's electric power consumption, CO₂ emissions and performance figures.

Further information on official fuel consumption figures and the official specific CO₂ emissions of new passenger cars can be found in the "Guide on the fuel economy, CO₂ emissions and power consumption of all new passenger car models," which is available free of charge at all sales dealerships and from DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen, Germany (www.dat.de).
