The new Audi A4, A5, S4, and S5 competition edition packages create an even sportier appearance

- Two new attractive equipment packages allow for even greater customization
- Audi presents numerous add-on parts in high-gloss black
- The attractive packages start from 950 euros for the A4 and S4* and 1,450 euros for the A5 and S5*

Ingolstadt, October 31, 2022 – With the competition edition and competition edition plus packages, Audi is expanding its attractive and comprehensive range of customized equipment for the A4 and A5 and the S4* and S5*. In addition to Matrix LED headlights (equipment-dependent) and numerous add-on parts in high-gloss black, the new finishes Chronos Gray Metallic, Ascari Blue Metallic and District Green Metallic expand the array of colors for both series.

**Sporty yet elegant**
In order to ideally stage both edition packages, which are based on the S line and the S model respectively, Audi is painting the following add-on parts in high-gloss black: the radiator grille, the stone chip protection strip (only on the A4), the air intakes along with the clips, the diffuser, and the tailpipes. The Singleframe radiator grille, the four rings in the front and rear, the side mirrors (only in combination with the plus package), the design element below the A-pillar, and the rear spoiler are also painted high-gloss black (not for the A5 Cabriolet* or A4 Avant* with RS roof edge spoiler). On the S model, the model designation in the radiator grille also comes in black and red. For the Audi A5 Cabriolet*, the windshield frame, window slot trim, trim on the side windows, and the trim on the top case lid remain as characteristic features in distinctive, elegant chrome. All S models as well as the A4* and A5* with the S line package feature dark chromed exhaust tips. The Audi S5 Cabriolet* is the exception: it always arrives with glossy black exhaust tips.

In conjunction with the competition edition plus package, customers will also receive the following features at a discount: black side mirrors, the entry-level LED logo projection with the rhombus/S logo, the ambient light package, red brake calipers (only for cars with 150 kW and more), and the “Audi Rings” decal in Brilliant Black for the rear doors (lower side panel on the A5 Coupé* and Cabriolet*). Usually only available on RS models, smoked head lamp covers are available for the first time on A4 and S4* models with Matrix LED headlights as well as on...
Audi A5 and S5* models with Matrix LED headlights and Audi Laser Light as additional high beams.

The new competition edition and competition edition plus packages will be available in Germany from January 2023. Prices start at 950 euros for the A4 and S4* and 1,450 euros for the A5 and S5*. The competition edition plus packages are available for 2,450 euros for the A4 and S4*, and 3,150 euros for the A5 and S5*.

The Audi Group is one of the most successful manufacturers of automobiles and motorcycles in the premium and luxury segments. The brands Audi, Ducati, Lamborghini and Bentley produce at 21 locations in 13 countries. Audi and its partners are present in more than 100 markets worldwide.

In 2021, the Audi Group delivered around 1.681 million cars from the Audi brand, 8,405 sports cars from the Lamborghini brand and 59,447 motorcycles from the Ducati brand to customers. In the 2021 fiscal year, AUDI AG achieved a total revenue of €53.1 billion and an operating profit before special items of €5.5 billion. More than 89,000 people all over the world work for the Audi Group, around 58,000 of them in Germany. With its attractive brands, new models, innovative mobility offerings and groundbreaking services, the group is systematically pursuing its path toward becoming a provider of sustainable, individual, premium mobility.

*The collective fuel/electric power consumption and emissions values of all models named and available on the German market can be found in the list provided at the end of this text.
Fuel/electric power consumption and emissions values** of the models named above:

**Audi A4 Avant**
Combined fuel consumption in l/100 km: 7,2-4,0 (32.7-58.8 US mpg);
combined CO₂ emissions in g/km: 167-106 (268.8-170.6 g/mi)

**Audi S4**
Combined fuel consumption in l/ km: 6,5-6,3 (36.2-37.3 US mpg);
combined CO₂ emissions in g/km: 170-167 (273.6-268.8 g/mi)

**Audi A5 Coupé**
Combined fuel consumption in l/100 km: 7,1-4,0 (33.1-58.8 US mpg);
combined CO₂ emissions in g/km: 162-104 (260.7-167.4 g/mi)

**Audi A5 Cabriolet**
Combined fuel consumption in l/100 km: 8,2-4,2 (28.7-56 US mpg);
combined CO₂ emissions in g/km: 188-112 (302.6-180.2 g/mi)

**Audi S5**
Combined fuel consumption in l/100 km: 8,2-6,3 (28.7-37.3 US mpg);
combined CO₂ emissions in g/km: 188-167 (302.6-268.8 g/mi)

**The indicated consumption and emissions values were determined according to the legally specified measuring methods. Since September 1, 2017, type approval for certain new vehicles has been performed in accordance with the Worldwide Harmonized Light Vehicles Test Procedure (WLTP), a more realistic test procedure for measuring fuel consumption and CO2 emissions. Since September 1, 2018, the WLTP has gradually replaced the New European Driving Cycle (NEDC). Due to the more realistic test conditions, the consumption and CO2 emission values measured are in many cases higher than the values measured according to the NEDC. Additional information about the differences between WLTP and NEDC is available at www.audi.de/wltp.**

At the moment, it is still mandatory to communicate the NEDC values. In the case of new vehicles for which type approval was performed using WLTP, the NEDC values are derived from the WLTP values. WLTP values can be provided voluntarily until their use becomes mandatory. If NEDC values are indicated as a range, they do not refer to one, specific vehicle and are not an integral element of the offer. They are provided only for the purpose of comparison between the various vehicle types. Additional equipment and accessories (attachment parts, tire size, etc.) can change relevant vehicle parameters, such as weight, rolling resistance and aerodynamics and, like weather and traffic conditions as well as individual driving style, influence a vehicle’s electric power consumption, CO2 emissions and performance figures.

Further information on official fuel consumption figures and the official specific CO2 emissions of new passenger cars can be found in the “Guide on the fuel economy, CO2 emissions and power consumption of all new passenger car models,” which is available free of charge at all sales dealerships and from DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Str. 1, 73760 Ostfildern-Scharnhausen, Germany (www.dat.de).
